

Ökonomisches Empowerment durch low tech und Marktzugang

Text
Humission e.V.

27.09.2025

Humission

- Founded 2017, currently >60 members
- Started with clay oven building and funding education

Our goals

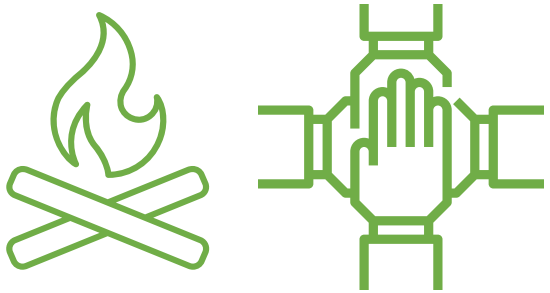

- Work **together** to adress key challenges
- Lack economic opportunities: Economic empowerment
- Food insecurity: Sustainable agriculture
- Deforestation/Health: Sustainable and safe cooking methods

Clay cooking ovens

Clay oven construction was the ideal start to the project work on the ground

Clay stoves

Clay stoves:.

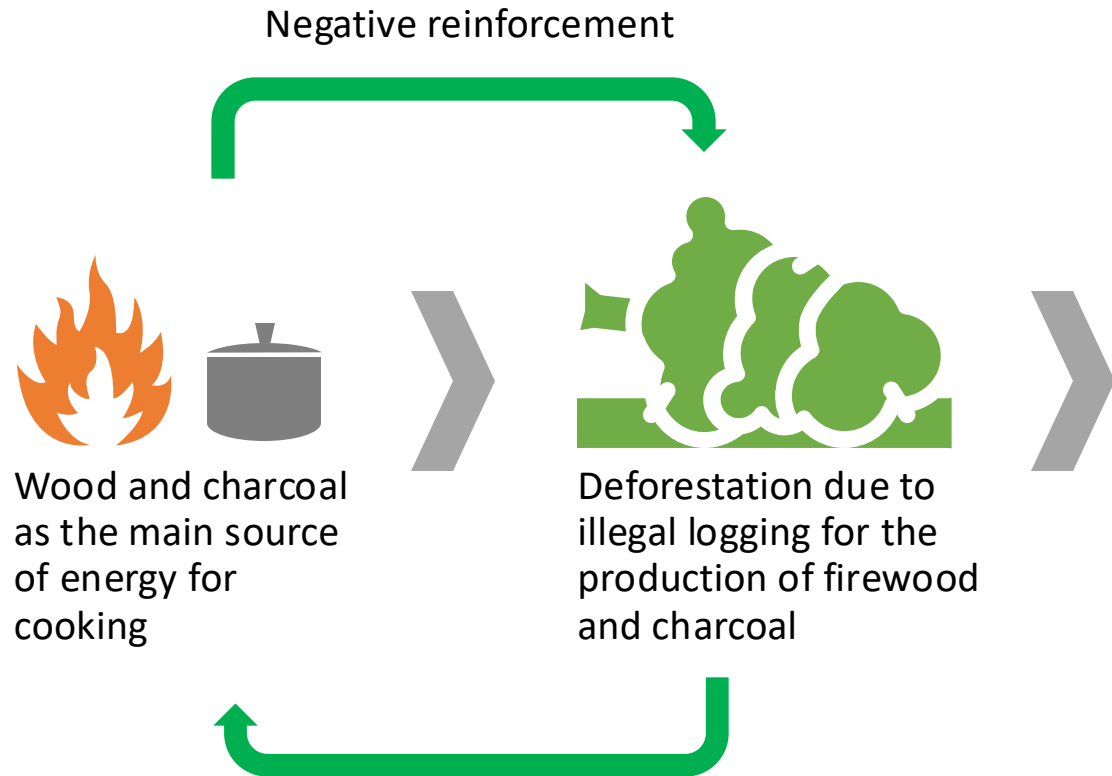

Efficient and safe cooking method

Over 1200 ovens have been build around Benga

Established Humission as trusted local partner

People in Malawi rely on charcoal and firewood for cooking, which leads to a number of problems such as erosion, climate risks and criminalization.

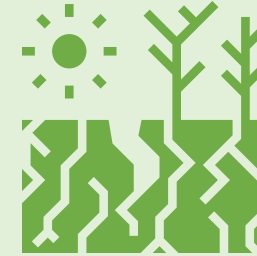

Concept idea - problem situation

A series of issues

Erosion due to lack of trees

Less climate resilience

Risk of penalties through criminalization

Lower yields and higher risk of crop failure

Inhalation of smoke from burning wood

Lack of affordable alternatives

Concept idea - solution approach

Agricultural residues

Corn cob waste

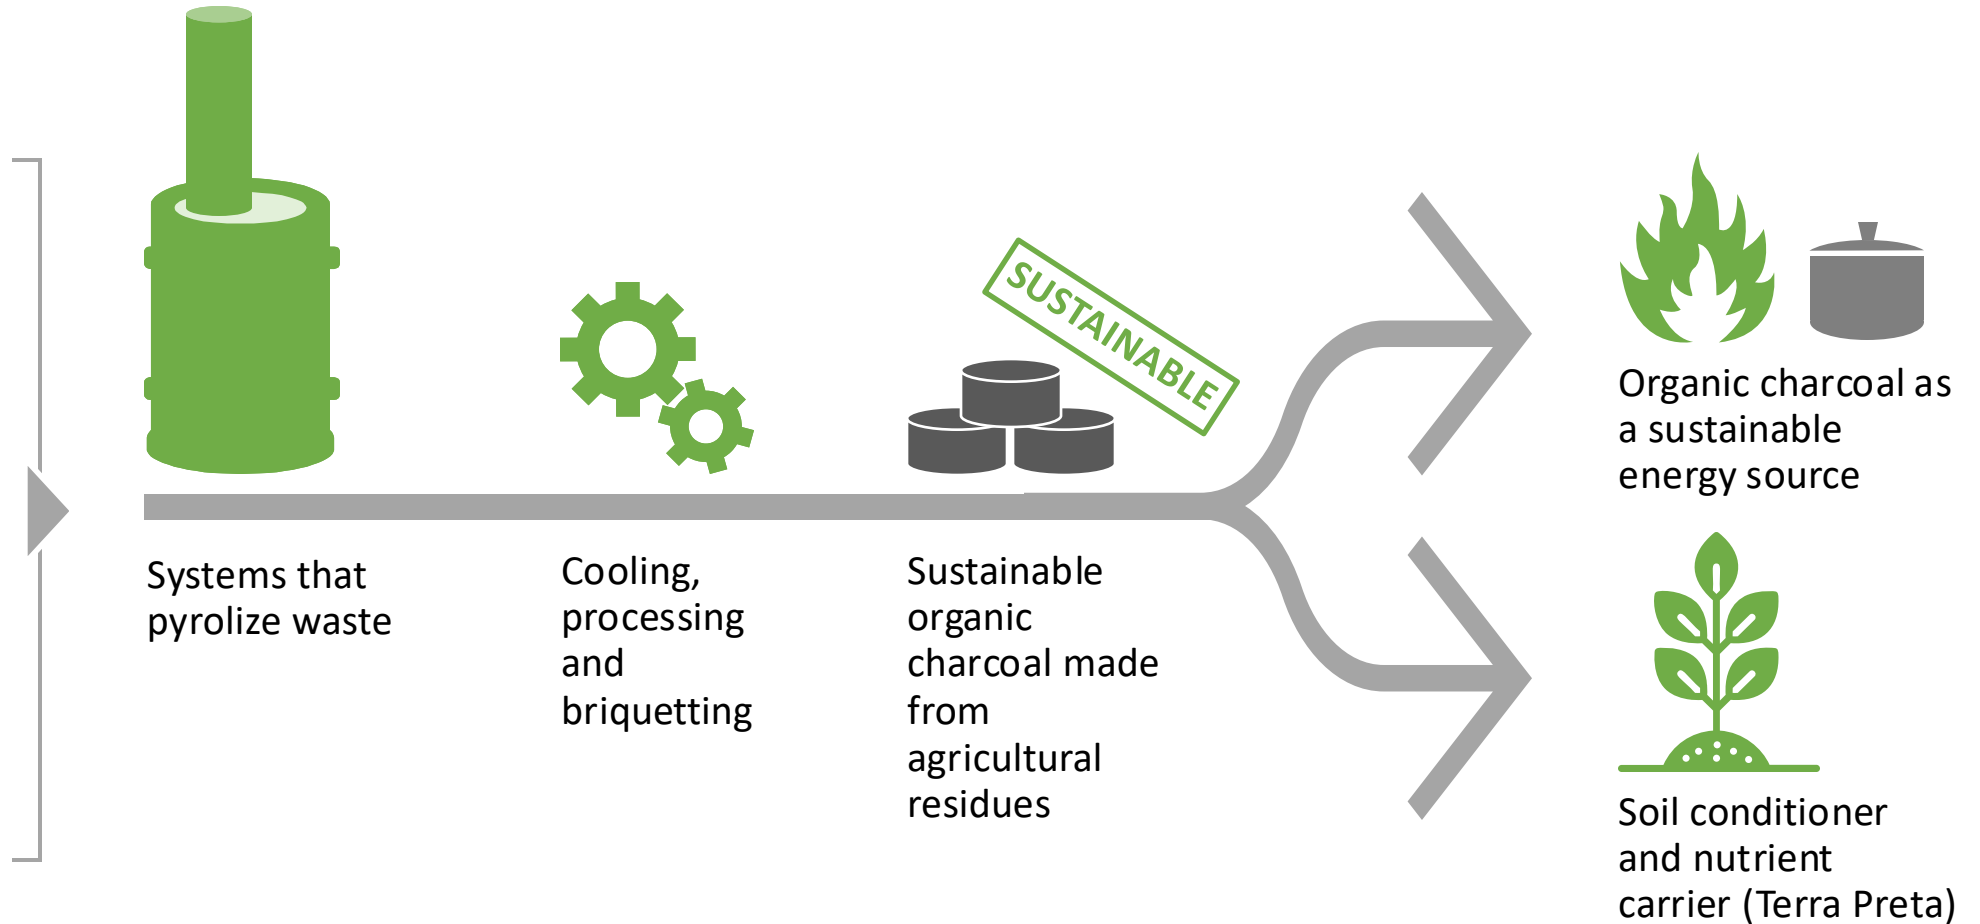

Harvest waste

Sugar cane waste

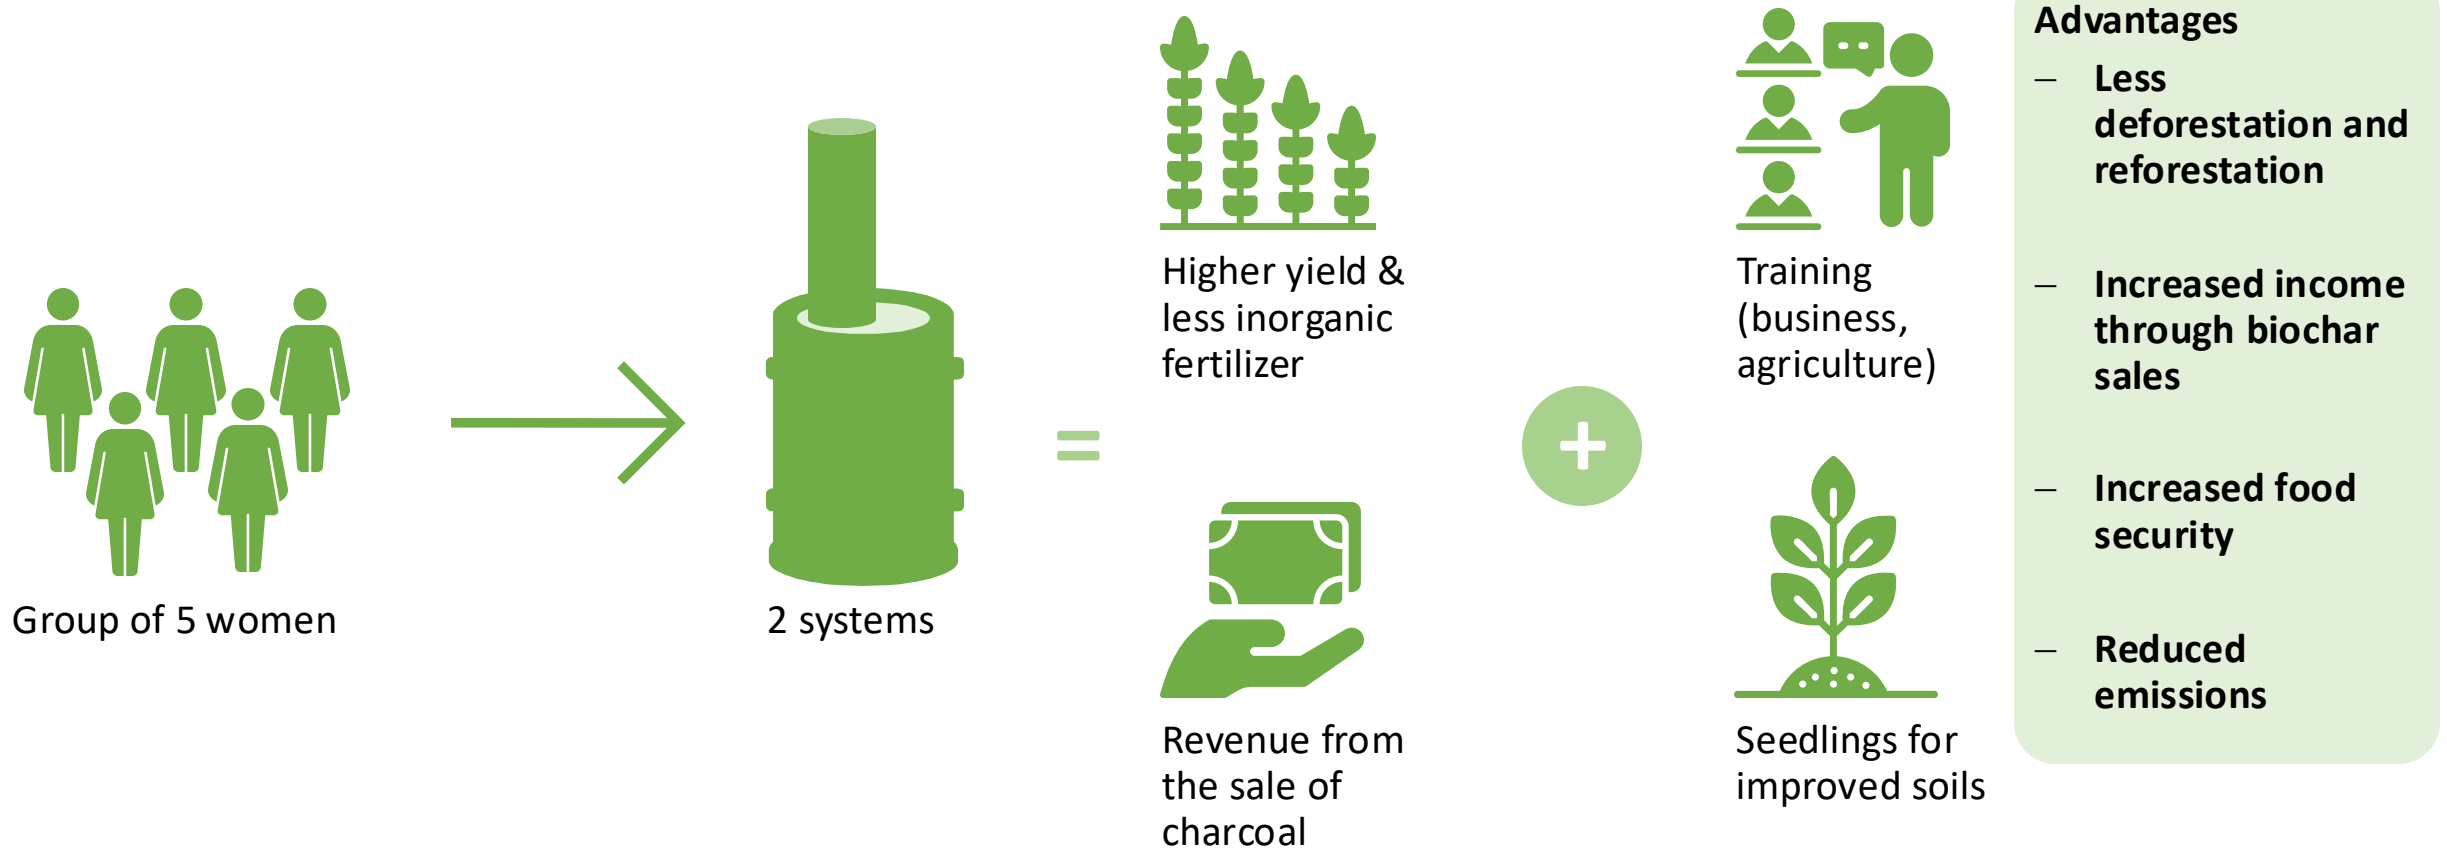

Large weed

Beneficiaries are provided with the equipment to start their own biochar business, which brings a multitude of benefits for the individual and the environment

Qualitative view of the beneficiaries

Our system enables smallholder farmers to produce biochar from agricultural waste as a sustainable source of energy and soil conditioner

**Kaffee
Tikondane** 
eine Marke von: Tiyeni Tikondane

Our non-profit business model

Transparent and fair payment of farmers

- Direct and transparent payment of farmers **above fairtrade prices**
- Assurance that every farmer gets fair share
- Price that allows farmers to invest in their business

Growing together with farmers

- Selling great Malawian coffee as origin in Europe
- Investing in **sustainable agriculture practices and infrastructure** for farmers

Full profit dedication to our projects in Malawi

- Full dedication of all profits to Humission projects
- Spread of impact to other Humission projects as well (e.g. bio charcoal to replace firewood)
